Subject: Michigan Plaza QMR and EPA Results?

Hi Erin,

I just wanted to give you an update. We should have the QMR wrapped up and to you by the end of this week. There was nothing 'out of the ordinary.' Based on some of the concentrations trend and what appear to be slowing dechlorination responses, we are strongly considering an additional injection this fall near Source Area C. The other two areas still seem to be actively responding to the CAP 18.

Also, I haven't seen anything from the EPA regarding the split sampling event in early July. Have results been provided?

Thanks!

Sarah E. Webb, L.P.G.
